## Skills

---

- Python | JavaScript | MySQL | NoSQL | Git | VBScript | XML | Automation Anywhere A360 | UiPath | Selenium | Power Automate Desktop and Cloud | Advanced Scripting & Automation | Data Process Optimization | Continuous Improvement | Portuguese (Native) | English (Intermediate)

## Experience

---

**Senior RPA Developer at Practia Global | São Paulo, SP, BR | 09/2023 - Current**

- Development of business process automation solutions, focused on high scalability, operational efficiency, and integration of external resources (**AI - Artificial Intelligence, VBS, Python, APIs**), using technologies such as **A360, UiPath, Power Automate (Desktop & Cloud), XML and SQL**. Responsible for the entire development cycle, from requirements analysis, robust solution architecture, unit testing, to production deployment, ensuring traceability through comprehensive documentation (SDD - Solution Design Document).

**RPA Developer at Practia Global | São Paulo, SP, BR | 06/2021 - 08/2023**

- Development and implementation of automation solutions for business process optimization, using **A360, UiPath, Python, VBS, APIs, SQL and XML**. Involvement in the full cycle of automations, from requirement analysis to final delivery, ensuring operational stability and efficiency. Creation of detailed documentation (SDD - Solution Design Document) for standardization and traceability of automated processes.

**RPA Business Analyst II at Deloitte Touche Tohmatsu Limited | São Paulo, SP, BR | 08/2019 - 05/2021**

- Involved in the analysis, development, and optimization of automated solutions using **AA v10 and v11, A2019 and UiPath**, ensuring greater operational efficiency and reduction of manual errors. Responsible for gathering requirements, mapping processes, and structuring detailed documentation (PDD - Product Design Document and SDD - Solution Design Document) to ensure the correct implementation of automations.

**RPA Business Analyst I at Deloitte Touche Tohmatsu Limited | São Paulo, SP, BR | 09/2018 - 07/2019**

- Involvement in the development of automation solutions to optimize internal processes, using **AA v10 and v11** to reduce manual intervention and increase efficiency. Responsible for structuring the initial documentation of the projects, including PDDs - Product Design Document, ensuring clarity and alignment with business guidelines.

## Education

---

### Higher

- Bachelor's Degree in Computer Science at **Anhembi Morumbi** | São Paulo, SP, BR | 01/2022 - 12/2022
- Bachelor's Degree in Computer Science at **UNISANTOS** | Santos, SP, BR | 01/2017 - 12/2021

### Technical

- Computer Network Technician at **SENAI** | Santos, SP, BR | 07/2013 - 06/2015

### Short Courses

- Git and GitHub at **Alura** | 2025
- Advanced Automation Certification at **Automation Anywhere University** | 2024
- Level I, II e III at **Robocorp** | 2023
- Machine Learning: Classification with Scikit-Learn at **Alura** | 2023
- REST API with Python and Flask at **Udemy** | 2023
- RPA Developer Advanced at **UiPath Academy** | 2022
- More courses on: [LinkedIn](#)

## Others

---

**HackMED – Conference and Health Hackathon | São Paulo, SP, BR | 02/2020**

- We created a project for medical solutions, focusing on Primary Care and Telemedicine. I was responsible for the business vision and final presentation. The event was attended by major companies and institutions, including MIT, Dell, and Intel.

**Hackathon Code of Law | Santos, SP, BR | 10/2019**

- Received **Honorable Mention**. My group stood out, and I continued supporting other teams, helping to prepare the final presentation of a solution that gained recognition.
